

How to collect all storage devices connected to Windows systems?

1. Choose the organization and corresponding account to collect all storage devices connected to Windows systems.

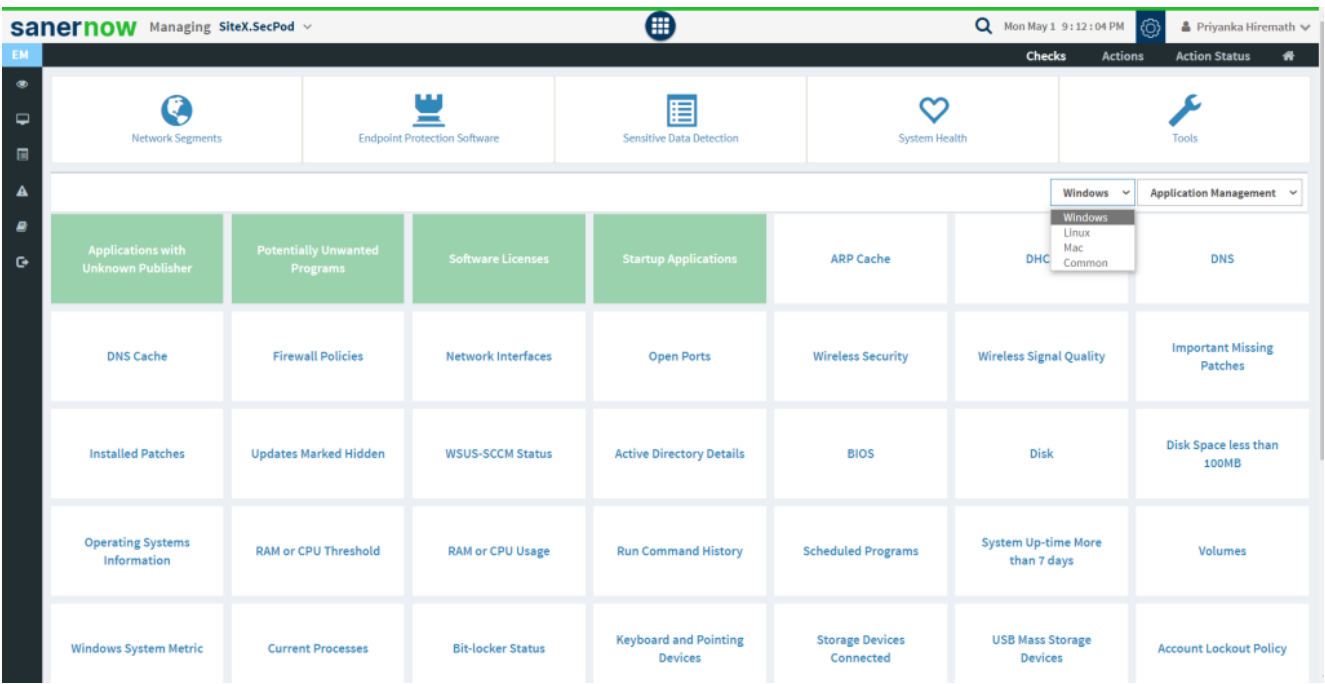

2. Select the **Endpoint Management** module

3. Click on **Checks** on the right top corner

4. From the drop-down menu, select **Windows** and **Device Management**

5. Followed by scrolling down, the checks are highlighted in green. Select **Storage Devices Connected**.

6. To schedule the query execution for the agent, click on **Trigger**. You need to fill up query trigger settings:

- Set the Query run count time in seconds.

Query Trigger Settings

Query run count: 2 time(s)

Run query every: 1 minute(s)

Schedule options

How often: ☐ Immediate ☐ Daily ☒ Weekly ☐ Monthly ☐ Date

☒ Run Every Selected Weeks weeks on Selected Days days

Query Trigger Time Frame: HH MM AM - HH MM AM
