# How to collect BIOS information such as serial number, version, manufacturer in Windows systems?

To collect the BIOS information of your Windows system, follow the below steps.
1. In SanerNow, go to **Endpoint Management module**.

2. In Endpoint Management module, click on **Checks**.

3. It will display you with various checks. On the right-hand side, select **Computer Information** from the dropdown list.

4. Also, select the Operating system: **Windows**.

5. The corresponding checks are displayed in green boxes.
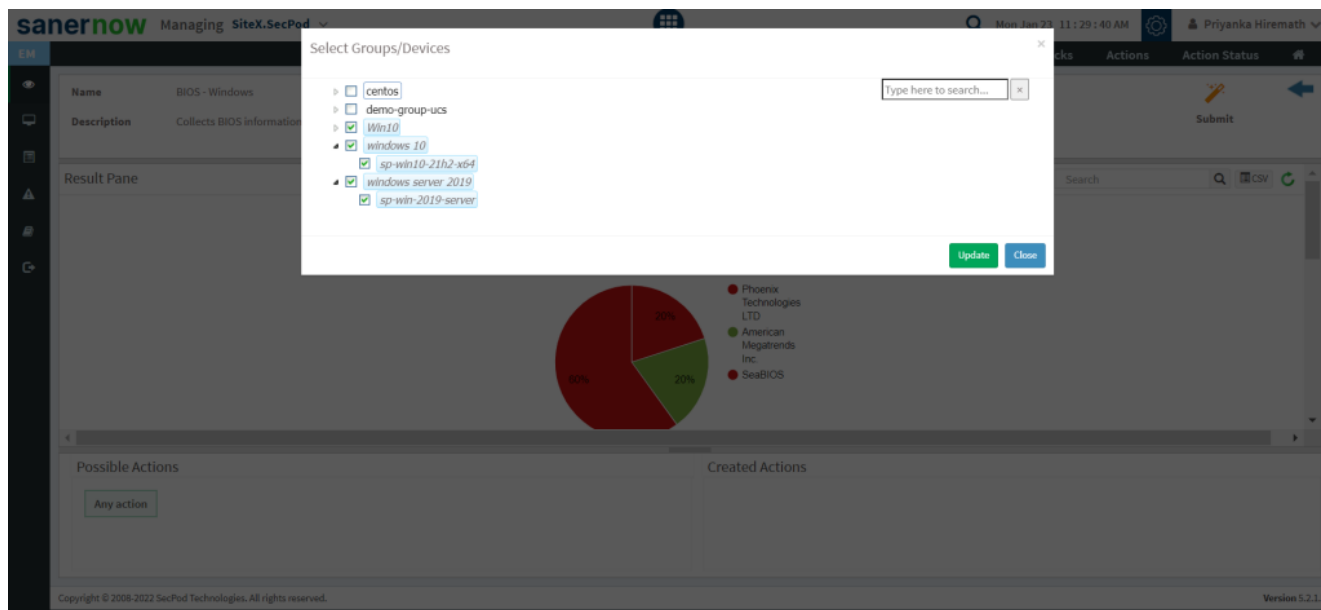

6. Now, click on **BIOS** check.

7. To schedule the query execution for the agent, click on **Trigger**. You need to fill up query trigger settings:
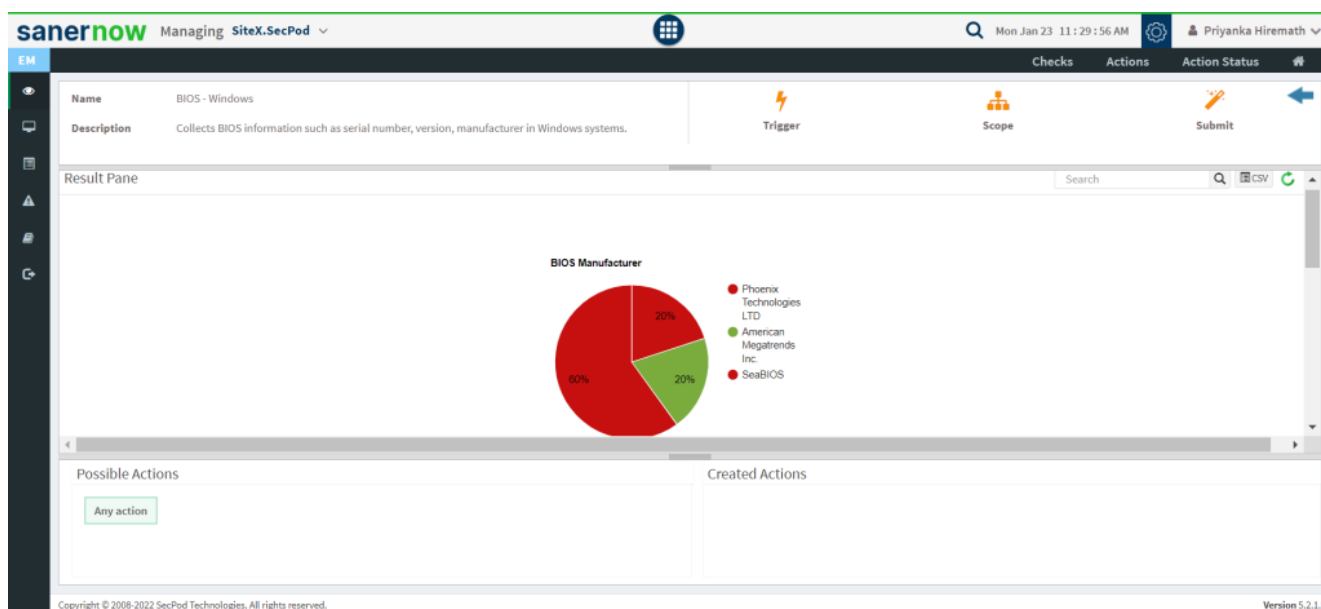

- Set the Query run count time in seconds.

- Set the time in minutes to run the query often.
- In Schedule options pane, set the **Query Trigger Time Frame**.
- Click on **Update**.

8. Click on the '**Scope**' to choose the scope of the query.

9. To send the query to agent, click on '**Submit**'.

10. In the **Result Pane**, you can check the BIOS information. You can also download the CSV format of the result pane.

11. You can take possible actions according to the results. Possible actions are specified at the bottom pane. Click on the desired action, you will be redirected to Create Response page. In Created Actions, you will find all the responses created for the BIOS check.

Now you know how to collect BIOS information such as serial number, version, manufacturer in Windows systems.
