

How to create new response in PA tool?

1. Click on the **Create New Response** option. The response building page is displayed with a network interface index, unique ID, IP address, and MAC address fields.

2. Select the devices and groups. Click on the **Deploy** option at the top right corner. And then you will see the Deploy Package dialog box on the screen.

3. Specify a response name and the response description.
4. Specify when you want to run the response - immediately, daily, weekly, monthly, or on a specific date. Specify the time, the corresponding days of the week, and the days of the month. Or

date.

5. And then click on the **Create** button.

Now you know how to create new response in PA tool.
