
How to fetch the details of the mandatory fields from the Okta account?

- Login to the **Okta** account
- Go to **Applications**
- Click on **Create App Integrations**
- Select **API** services, click on **Next**
- Enter **App integration name** of your choice and click on **Save**
- Click on the application created and copy the **Client ID**
- Click on **add key** and add a public key of the organization and use the **private key** to create MFA policy in SanerNow
- Click on **Save**
- Under Okta API scope option in the application, grant access for the policy creation
- Select "**Okta.user.manage**" and click on **Grant**
- Assign the required users to this application
- Copy the authentication path from the User section info on the top right

Now you know to fetch details of the mandatory fields from the Okta account.
