

How to manually import devices into SanerNow?

You can manually import devices into SanerNow by importing CSV file. Follow the below steps to import:

1. Go to Control Panel Settings and choose organization on which you want to import devices.

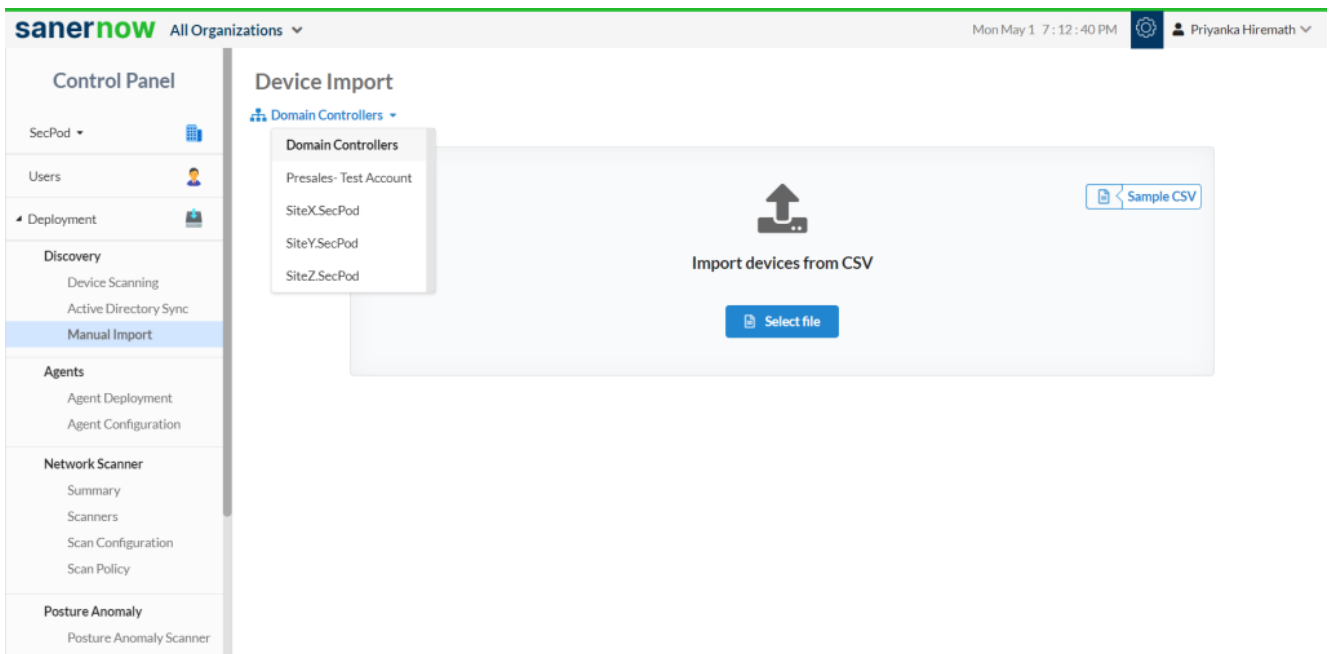

2. Under **Deployment** on the left-hand side, from the category of **Discovery**, select **Manual Import**.

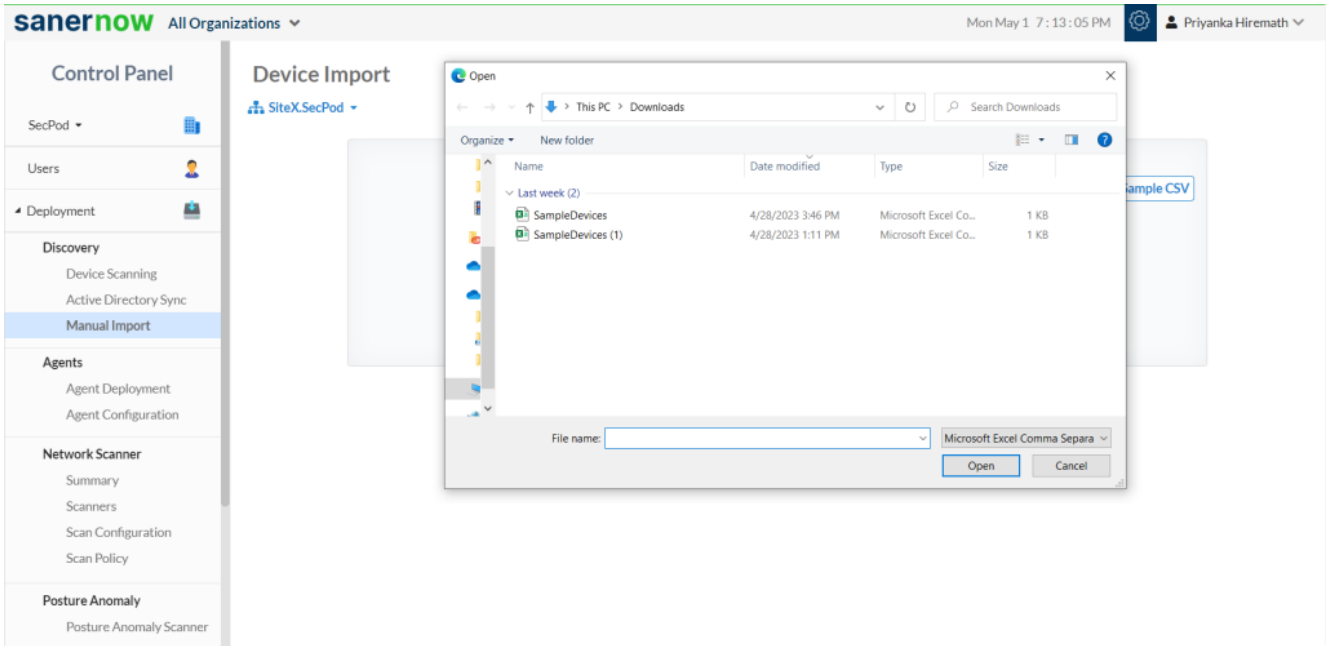

3. You can view the Sample CSV file placed the box

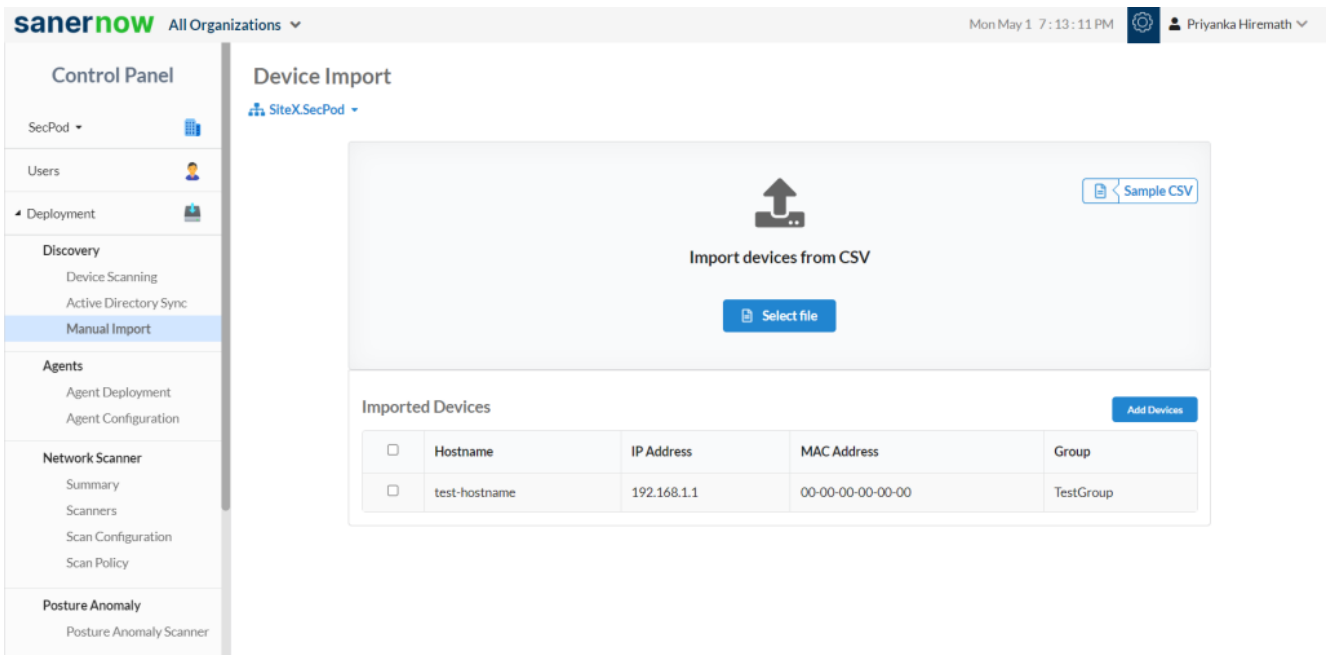

4. Choose the account and the organization to import devices.

5. Click on Select File and upload the file from your PC.

6. Select the devices from the list and click on Add Devices.
